

To former and present pupils

I am proud of so many aspects of school. You should know that I have always derived my greatest pride from the quality of the academic work, which you did for me in the classroom. Much of it has been quite inspirational. It has been my privilege to share Physics and Astronomy with you. Thank you for your good humour and patience — especially when on the receiving end of my anecdotes.

Strive to have a contented life, and to be a force for good in the lives of others. And take good care of our wonderful school. God bless.

DF
